

# **HR Employee Attrition Analysis**

Data Analyst Portfolio Project

Utkarsh Bisht

July 2026

# Business Overview

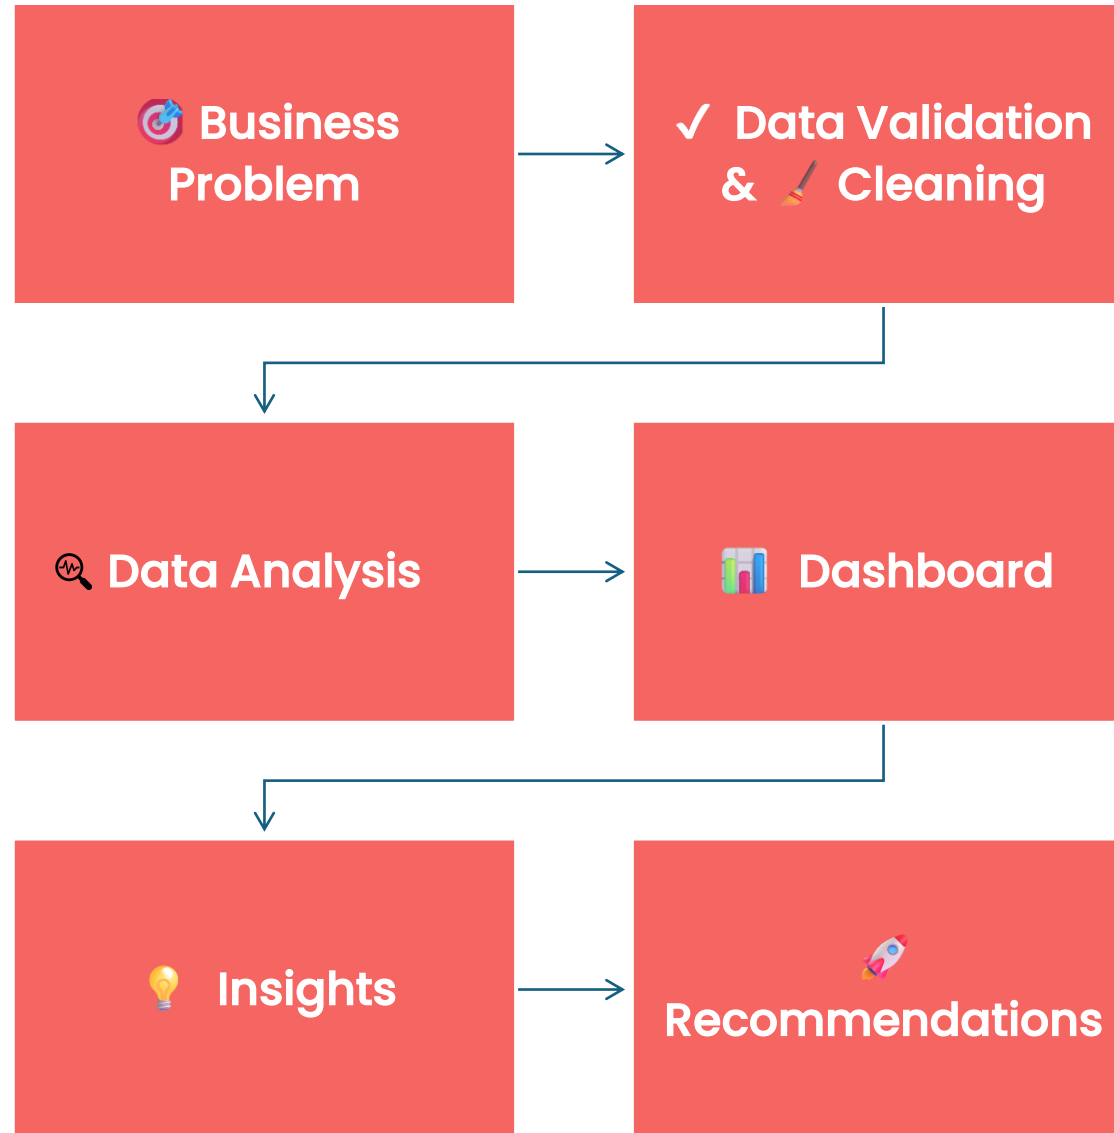

Analyzing employee attrition to identify key factors driving turnover and help HR improve **employee retention and workforce planning.**

## Business Problem

- Identify key factors driving employee attrition.
- Find employee groups with higher turnover.
- Compare attrition across departments.
- Support better employee retention decisions.

# Project Workflow

# Dataset Overview

- **Dataset:** IBM HR Analytics Employee Attrition & Performance
- **Records:** 1,470 employees
- **Features:** 35 employee-related attributes
- **Key variables:** Age, Monthly Income, Job Satisfaction, Department, Distance From Home, Attrition
- **Target:** Employee Attrition (Yes/No)
- **Purpose:** Analyze factors associated with employee turnover.

# Dashboard

## HR Analytics Dashboard

Average of Income  
**6.50K**

Total Employees  
**1.47K**

Employees Attrited  
**237**

Attrition Rate  
**16.12%**

Attrition Rate by Department

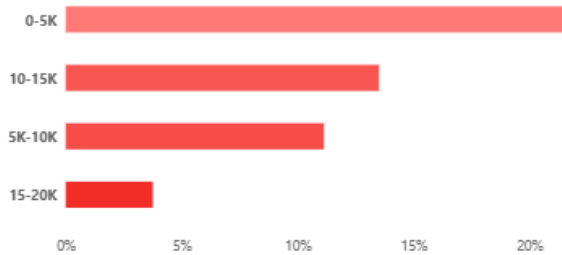

Attrition Rate by Age Group

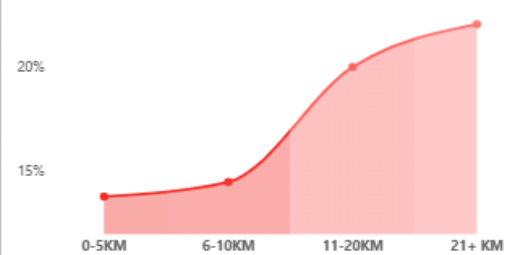

Attrition Rate by OverTime

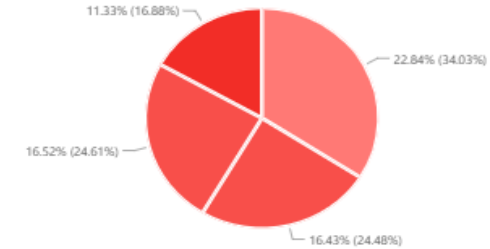

Attrition Rate by Income Range

Attrition Rate by Distance From Home

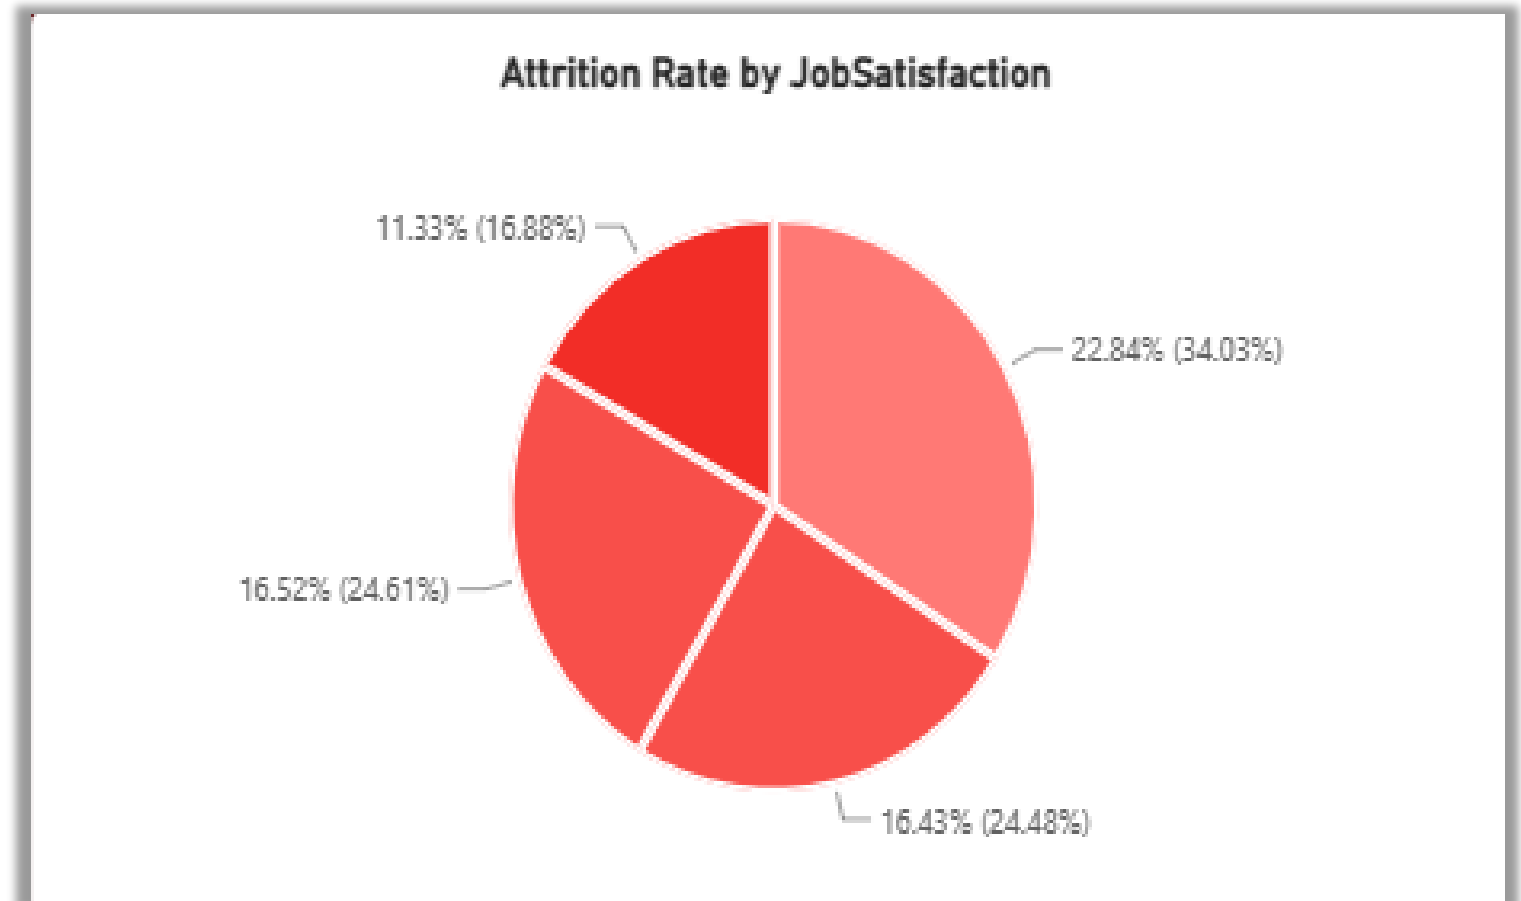

Attrition Rate by JobSatisfaction

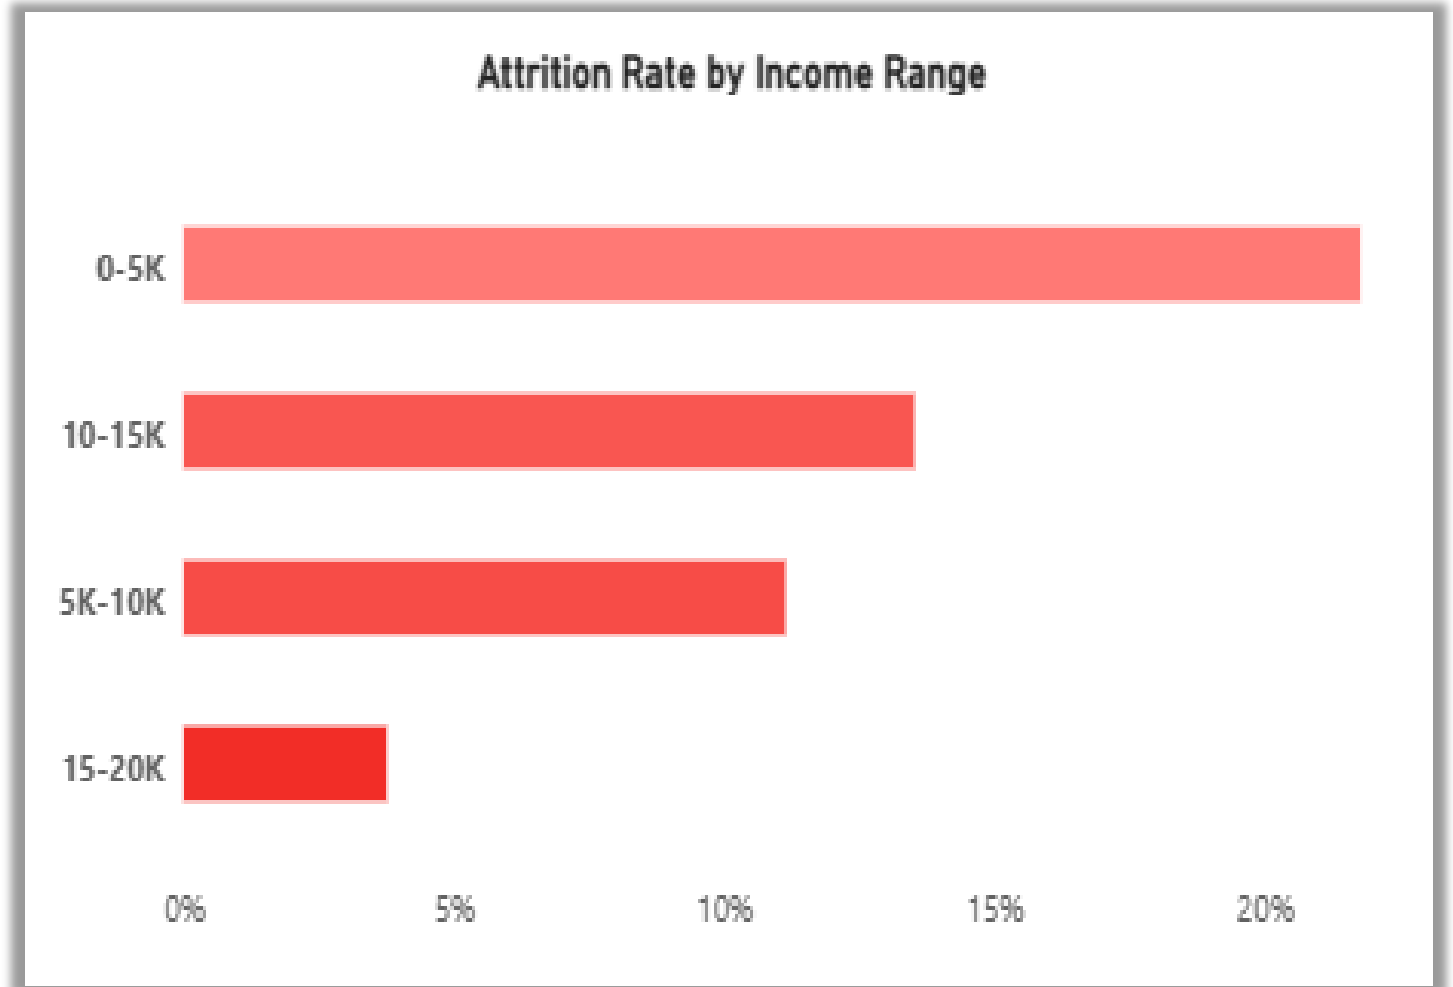

## Key Findings

1. Lower job satisfaction is associated with higher employee attrition.

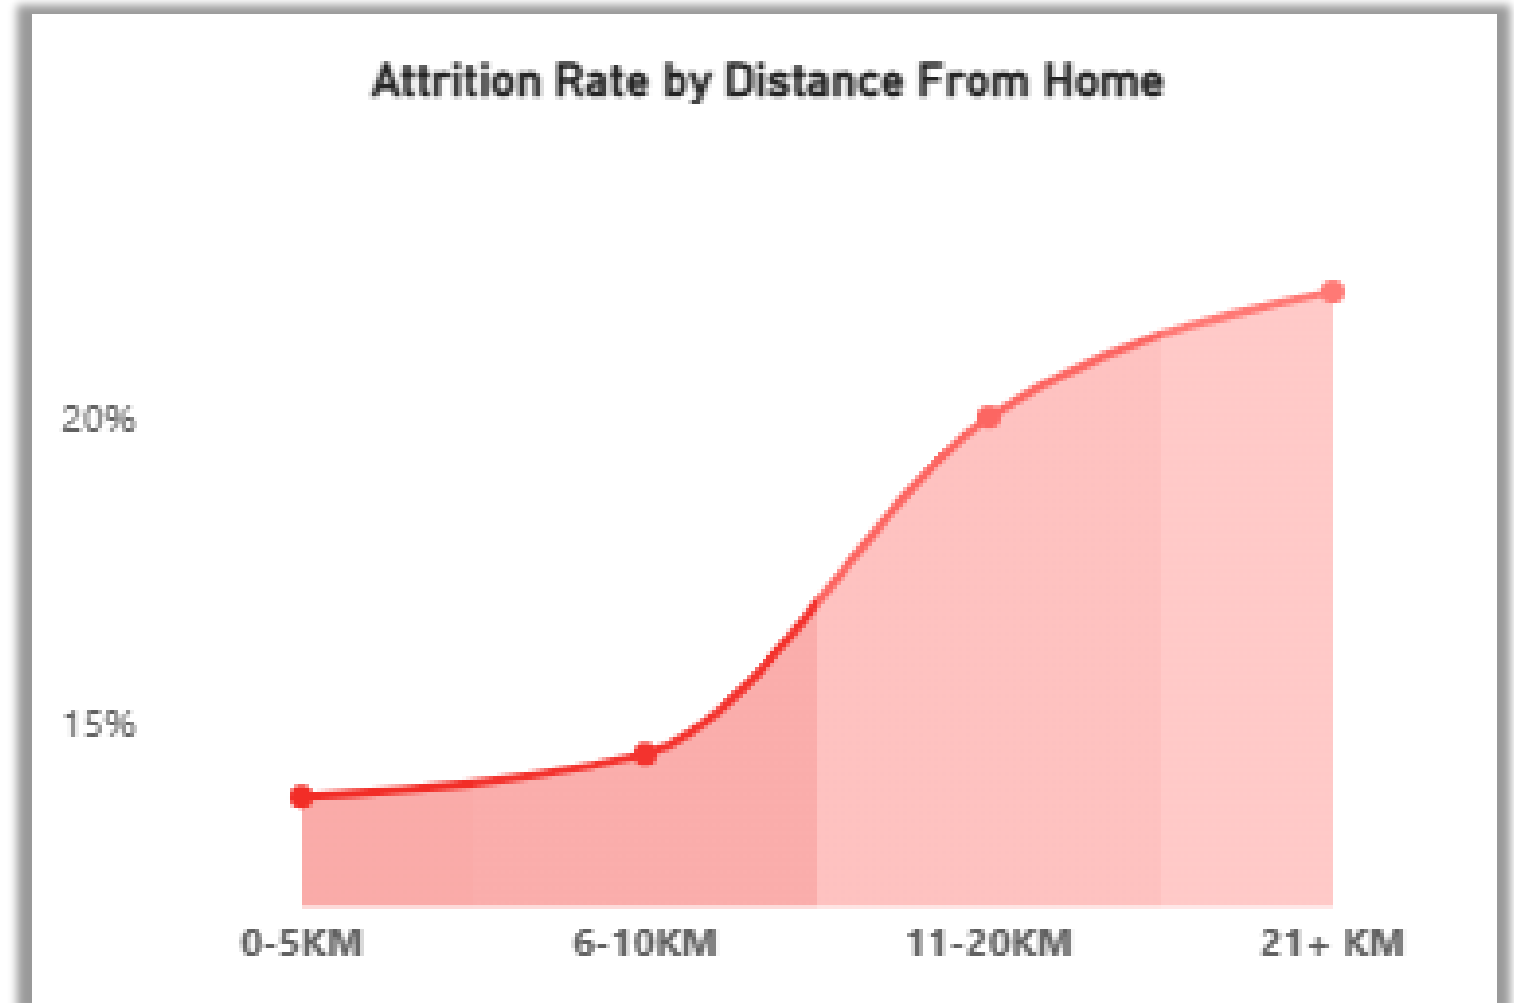

## Key Findings

2. Lower-income employees show relatively higher attrition.

## Key Findings

3. Employees living farther from the workplace show higher attrition.

# **Recommendations**

## **Improve Satisfaction**

**Improve employee satisfaction through feedback, recognition, and career growth.**

## **For Young Employees**

**Provide career development and mentorship opportunities for younger employees.**

## **For Young Employees**

**Review compensation for lower-income and high-attrition employee groups.**

## **For Young Employees**

**Consider flexible work options for employees with longer commutes.**

## **Conclusion**

- Employee attrition varies across key employee characteristics.
- Lower job satisfaction and monthly income are associated with higher attrition.
- Younger employees and employees living farther from the workplace show relatively higher attrition.
- Attrition varies across departments, highlighting areas that require further investigation.
